FLYING FLEA C6 DELIVERIES COMMENCE IN BENGALURU

Flying Flea, the new city+ electric mobility brand from Royal Enfield, today commenced deliveries of its first motorcycle, the FF.C6, in Bengaluru. Beyond the motorcycle, Flying Flea has built an integrated ownership ecosystem that keeps riders connected, supported and effortlessly on the move. With multiple touchpoints operational across Bengaluru, the hub-and-spoke network delivers comprehensive service coverage and convenient access for customers across the city.

The hub service centre in BTM Layout will manage specialised service support, while the spoke centres spread across the city will handle regular service and maintenance. Unlocking existing network advantage, Flying Flea will operate a shop-in-shop format within current Royal Enfield showrooms and service centers to ensure extensive reach. Additionally, every FF.C6 comes with 24x7 Roadside Assistance, ensuring help is always within reach.

Flying Flea is following a city-by-city approach for the roll-out of FF.C6. Available in two colour options- Storm Black and Flea Green- the FF.C6 is priced at ₹2.79 Lakh (ex-showroom); ₹1.99 Lakh (Battery-as-a-Service).

For more information, visit flyingflea.com or experience the Flying Flea C6 at the **Flying Flea store** in [Jayanagar](#), Bengaluru.
