FLYING FLEA LANDS IN PUNE WITH 10 SALES AND SERVICE CENTRES

Flying Flea, the city+ electric mobility brand from Royal Enfield, has further expanded its presence in India, with Pune becoming the third city to welcome the brand.

Building on the strong customer response to the Flying Flea C6 in Bengaluru and Hyderabad, where owners have already clocked over 1.25 lakh kilometres, the brand has now established 10 sales and service centres across Pune. Strategically located across the city, these centres will make it convenient for customers to explore, experience and own the FF.C6.

With 12 sales and service centres in Bengaluru and 4 in Hyderabad, the expansion reflects Flying Flea's continued focus on building a robust retail and ownership ecosystem, strengthening accessibility and after-sales support in key locations across every city it enters.

Supporting this network is Flying Flea's hub-and-spoke ownership ecosystem, designed to deliver efficient and reliable service. Each dealer across Pune is equipped to provide both dedicated technical support and routine service and maintenance, ensuring a hassle-free ownership journey for customers.

Flying Flea Customer Sales and Service Centres	Location
