THE BIGGEST EDITION OF THE HIMALAYAN ODYSSEY WRAPS UP WITH AN EPIC FINISH

Nearly three decades after it first began, the Royal Enfield Himalayan Odyssey has completed its biggest chapter yet, bringing together riders from eight countries for its 22nd edition.

In Royal Enfield's 125th year, the 2026 Odyssey expanded beyond its traditional format for the first time, with three distinct expeditions - Original, Xplore, Nubra - collectively covering more than 4,200+km across the Himalayas and over some of the highest motorable roads in the world.

22 editions on, the Himalayan Odyssey continues to draw riders back to the Indian Himalayas for reasons that have changed little over time: the challenge of the road, the untamed landscapes beyond the next bend, and the camaraderie forged through the journey.

The 2026 edition also continued Royal Enfield's **#LeaveEveryPlaceBetter** initiative, encouraging riders to leave the landscapes and communities they travelled through better than they found them.
